

mini

mini

Small, but perfectly formed! Designed for houses and offices, the Mini has the same basis as our professional machines: the multi boiler technology. The brewing unit is separated from the boiler and is the same as used for the Evolution and the dc pro. The 3 liters water tank makes the machine adaptable and autonomous from water supply. Furthermore the Mini offers the possibility to discover the full potential of an espresso blend: the brewing temperature can be regulated to whatever degree you like. So let the proof of taste begin also at your house.

dimensions (w x h x d)	(mm)	260x390x375
weight	(kg)	22
connected load		230/240 V 1 Ph, 115 V 1 Ph - 50/60 Hz
boiler capacity	(l)	1,5
capacity group heads	(l)	0,5
water tank	(l)	3
